

About CTX

Copytronix (CTX) has been providing technology solutions to the Oregon and SW Washington community since 1965. From document management to multifunctional systems, we provide the broadest portfolio of technology and services for companies of any size and industry.

CTX was acquired by Global Imaging Systems, www.global-imaging.com (headquartered in Tampa, Florida), in 1997. Global Imaging Systems operates 226 operating units across the country with 4,390 employees serving 150,000+ customers.

Because of our continued success year after year, in 2007, Global Imaging Systems and all of its operating units across the country became a wholly owned subsidiary of Xerox Corporation (NYSE: XRX) and added Xerox document technology and services to its offerings. Maintaining our local focus and independent approach to sales, service and customer support but also adding the benefits of the Xerox Corporation and its product line created an enormous benefit to our customer base.

- In the local area we have over 80 employees including over 23 technicians.
- Through Global Imaging Systems, our reach extends to 32 states with more than 130 locations nationwide with solutions sold and serviced by more than 4,500 employees.
- As a wholly-owned subsidiary of Xerox Corporation, we extend our reach globally with more than 57,000 employees.
- We align ourselves with best-in-class product and service manufacturers.

Sustainability>>>

We are committed to supporting every sustainable initiative. We stand behind all efforts of Xerox and our other partners to help customers reduce office waste, reduce the use of paper and manage equipment at end of life. Together with our employees, suppliers and customers, we strive to maintain the highest standard to preserve our environment:

>>Reduce energy use to protect our climate

We provide ENERGY STAR® energy-efficient products and solutions to our customers.

>>Prevent and manage waste

Many of the products and solutions we support are designed to use resources efficiently, minimizing waste and reusing or recycling materials. Xerox solid ink technology replaces cartridges - creating far less waste.

>>Preserve clean air and clean water

We are committed to using products that minimize the use of toxic materials and heavy metals - including initiatives to lower greenhouse gas emissions.

>>Preserve biodiversity and the world's forests

Many of the solutions we offer help reduce paper consumption through innovative software products and print-on-demand functionality.

We provide a total solution to maximize productivity and make your workflow more efficient.
